Hand & Arm Protection

Determine Your Glove Size

To ensure your gloves have the best fit and feel measure around the circumference of the palm—base of thumb and just below the knuckles. Keep in mind that these are general sizes, various styles may fit differently.

SIZE	MEASUREMENT
XS	6"
S	7"
M	8"
L	9"
XL	10"
2XL	11"

HAND & ARM PROTECTION

ARC FLASH, Welding & FLAME RETARDANT GLOVES

SPARX PERFORMER

Choose the Right Level of Cut-Resistance in Gloves

To help you make the best choices when selecting gloves for cut resistance, we've answered four of the most frequent questions about cut resistance.

WHAT IS A CUT SCORE?

A cut resistance score is measured by how many grams of pressure can be applied by a razor blade moving in a straight path across a swatch of glove fabric before cutting the glove. The "gram score" tells you how many grams of pressure the glove withstood before cutting through 0.8" (20 mm) or more. It is the average of multiple runs, using a new blade on each pass, and this "gram score" determines the Cut Score.

WHAT HAS CHANGED ABOUT CUT SCORES?

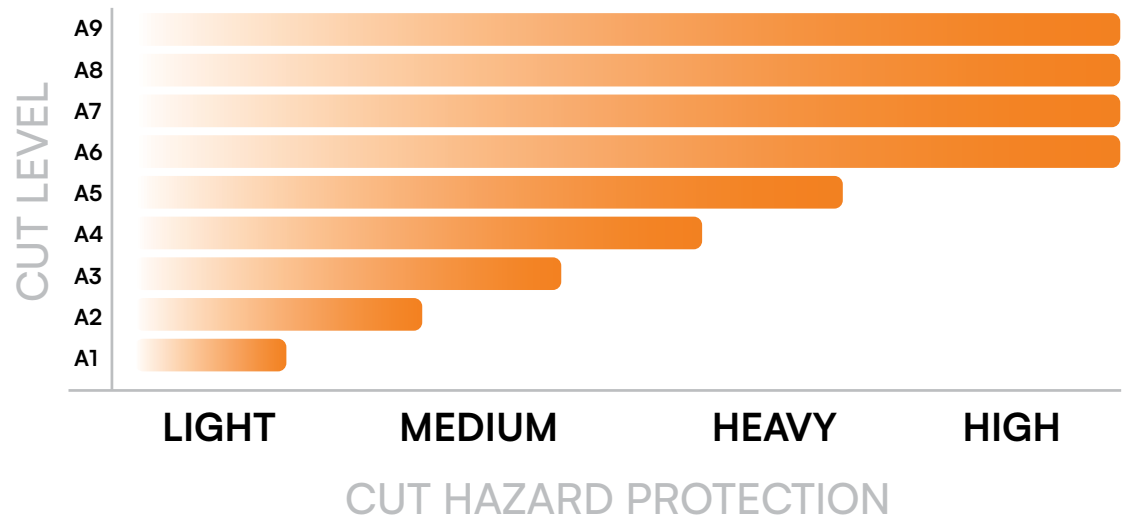

In the past, the ANSI rated gloves on a scale from 1 to 5. However, in February 2016, the ISEA released a new ANSI 105 hand protection standard to reflect innovation and advances in material technologies. The new standard includes updates to the classification levels for cut resistance (Cut Score) with a scale of 1 to 9. It also updates the method of testing gloves for cut resistance.

WHAT ARE THE CURRENT TESTING STANDARDS?

The current standard uses a Tomodynamometer Test Machine (TDM) to measure the weight in grams required for a blade to cut material. This improves accuracy of test results by designating a uniform test method using a single testing machine. All tests now require using the ASTM F2992-15 method on the TDM-100 machine.

HOW ARE CUT-RESISTANT SCORES CLASSIFIED?

The classification for cut resistance helps identify the appropriate protection for a job, because it precisely defines levels of cut resistance with narrowly gradated levels while providing for expanded upper limits on cut resistance.

LEVEL A1

Light cut hazards
200-499 Grams to Cut

Material handling, small parts assembly with sharp edges, packaging, warehouse, general purpose, forestry, construction.

LEVEL A2-A3

Light/medium cut hazards
500-1,499 Grams to Cut

Material handling, small parts assembly with sharp edges, packaging, warehouse, general purpose, forestry, construction, pulp and paper, automotive assembly.

LEVEL A4-A5

Medium/Heavy cut hazards
1,500 – 2,999 Grams to Cut

Appliance manufacturing, bottle and light glass handling, canning, drywalling, electrical carpet installation, HVAC, pulp and paper, automotive assembly, metal fabrication, metal handling, packaging, warehouse, aerospace industry, food prep/processing.

LEVEL A6-A9

High cut hazards
3,000 – 6000+ Grams to Cut

Metal stamping, metal recycling, pulp, and paper (changing slitter blades), automotive assembly, metal fabrication, sharp metal stampings, glass manufacturing, window manufacturing, recycling plant/sorting, food prep/processing, meat processing, aerospace industry.

MISSION 220

Dexterity & Cut Resistance

The Mission 220 is made of a high strength, high performance polyethylene fiber made from very high molecular weight polyethylene. This 13-gauge glove is exceptionally resistant to cuts and abrasion, yet lightweight and breathable. The gray polyurethane palm coating provides super grip and dexterity. This glove provides tactile sensitivity as well as comfort, and features a salt & pepper shell to hide dirt for extended wear. Cut Level 2. CE Cut level: 3. Abrasion Level: 4.

TAPTEX COVERALLS

Cost-Effective Splash Barrier

Taptex® protective coveralls are a cost-effective barrier against particulates and liquid splash. This lightweight garment offers durability, physical hazard and hydrostatic (water) resistance. Best suited for applications where particulate and light splash protection are needed to protect clothing. Ideal for asbestos removal, mining operations, and hazardous materials remediation. Taptex® coveralls feature an extended zipper for easy donning, set-in sleeves and elastic back for ease of movement. Wide leg openings and generous sizing construction. Exceeds ANSI sizing and endurance standards 101-1996. The “Bunny Suit” offers elastic wrists, hood and attached booties for protection against particulates and light water based splash or mist.

BLAZE 110

110 Breakaway Safety Vest, Class 2

The Blaze 110 safety vest by Truline is tested to the ANSI/ISEA 107-2015 standard and is designed to keep you safe from a distance. The 5-point breakaway style ensures you are not snagged or caught in machinery while on the job. The 360° reflective tape ensures visibility while working under low light conditions and the 3 inside pockets and mic tab make this a versatile, yet lightweight vest that is a must-have for workplace safety. Machine wash cold, tumble dry low.

Respirators

& MASKS

BREATHE FREE™ N95 RESPIRATOR

Non-Irritating with Adjustable Nose Clip

The Breathe Free™ N95 Respirator is a premium product at a great value. The reinforced outer shell resists structural collapsing that can be brought on by increased humidity. The wearer gets great fit and comfort from the adjustable nose clip with foam liner and non-irritating inner face piece. NIOSH approval: N95.

A501780

UOM: 1 Box / 20 per Box

AVAILABLE AT ARBILL.COM

**BREATHE FREE™
N95 RESPIRATOR WITH VALVE**

Latex and Metal Free

The Breathe Free+ offers less breathing resistance and an even more comfort than our original Breathe Free mask. In addition, this mask is 100% latex and metal free coupled with a soft half face foam seal for maximum fitting and reduced leakage properties. The advanced low resistant exhalation valve reduces hot air buildup in hot and humid environments.

A501860
UOM: 1 Box / 10 per Box

EVERYDAY FACE MASK

Antimicrobial Lightweight Cotton

Each feature-rich premium facemask is washable up to 50x per mask, thus more cost effective than using disposable masks. The 2 layer 100% cotton is breathable, comfortable and easy to fold into a purse, pocket or glove compartment when not in use. The outer layer is water repellent and the inner layer is treated with Silvadur™, a recognized antimicrobial & anti-odor agent.

Mask measures 7" L x 3" W and is latex-free.
